Elementary school, Middle school and gym "Guglielmo Marconi"

The school complex "Guglielmo Marconi", is a historical testimony of value monumental, recognized direct link pursuant to Legislative Decree 42/2004. Being a building of particular historical, architectural and environmental interest, a balanced intervention proposal has been developed that avoids the distortion of the actual situation. It is proposed to reduce the "seismic stress" by isolating the building from the ground at the base, taking into account the conditions linked to the historical monumental value.
