## Sewage treatment plant of Foce Regi Lagni

The sewage treatment plant of Foce Regi Lagni has a purification capacity of approximately 565,000 inhabitant's equivalents. Re-functionalization of buildings and electromechanical sewage and sludge line, new monitoring and remote-control network, remediation works, and environmental mitigation interventions the project involves the construction of the new sections keeping in operation the existing plant which will be subject to functional adjustment through the discontinuation of plant parts, ensuring the continuous purification of incoming sewage.

Project information block containing a site plan, technical specifications, and project details. It includes a legend for existing and project elements, a table of technical specifications, and a table of project details.
