## Garda Cycle route - Stretch Lombardo

The Garda Cycle route stretch Lombardo is a cycling ring around Lake Garda and was created to be an interregional cycling ridge of about 140 km, connected with the itinerary n. 7 "Path of the Sun" of the European cycling network EuroVelo. The Lombard part of the Ciclovía is part of the Route of Regional Interest n. 2 and, in the southern area of the lake, coincides with a stretch of the itinerary Bicitalia n. 12 "Ciclovía Pedemontana Alpina". The Regional Cycle Network provides a set of cycling routes that affect various types of infrastructure such as bike paths on their own, private lanes, towpaths and embankments; tracks of abandoned railway lines.
