

50th ANNIVERSARY OF COOPROGETTI

On **March 18, 2026**, Cooprogetti will celebrate an extraordinary milestone: its **50th anniversary**, a significant achievement representing both a moment of reflection on the path traveled and, above all, a valuable opportunity to share a vision for future prospects. Fifty years of projects, innovation, and cooperation narrate the company's growth and evolution over time, establishing it today as one of the most important Italian players in the engineering sector, looking to the future with renewed ambition and a focus on innovative objectives.

Alessandro Placucci, President of Cooprogetti, emphasized *"the importance of this milestone as an opportunity to value the experience gained and to strengthen our commitment to sustainable and shared growth, based on innovation, cooperation, and a strategic vision oriented toward the future."*

On the occasion of the anniversary, the Cooprogetti world will come together in a **global call** involving all Italian and South American offices, consolidating an important moment of sharing and dialogue. The event represents an opportunity to reinforce a common identity and share results and prospects that will accompany the initiatives planned throughout the year dedicated to the fiftieth anniversary. Starting in June, meetings and in-depth sessions are scheduled to celebrate this milestone and strengthen the company's future vision.

Marking this occasion is the **commemorative logo**, which combines the number "50" with the iconic stylized globe, a symbol of the brand since 1976: a graphic element expressing continuity, experience, and the ability to address the challenges of global sustainability.

As **Elisa Crimi**, Head of Communications, points out, *"the new logo represents the company's identity and growth journey, reflecting the values that have guided its development and strengthening the sense of belonging that characterizes this important anniversary. At the same time, it serves as a symbol of a clear projection toward the challenges and opportunities that will shape Cooprogetti's future."*

Fifty years of projects and shared vision transform the experience gained into new energy, opening fresh development perspectives.

Cooprogetti is a cooperative company operating in Italy and abroad, specializing in integrated design in the fields of infrastructures, buildings, environment, and territorial and agronomic systems. It represents **50 years of applied experience** in research and study activities, planning, design, and implementation of interventions on the territory, considered an essential asset to protect in order to build a sustainable future with reduced environmental impact.
